

PERSON PERFORMING SANITIZATION

Organization	Parted Magic LLC	Location	Waupaca
Phone	666-666-6666	Software	Parted Magic 2026_06_04

HOST SYSTEM

Manufacturer	Dell Inc.	Model	OptiPlex 7010
System Serial	F501GX1	Version	01

SANITIZATION SESSION

Started	Tue 18 Aug 2026 11:24:04 AM	Finished	Tue 18 Aug 2026 11:25:50 AM
Sanitization Standard	NIST SP 800-88r2 — per drive	Work Order	10919

MEDIA INFORMATION

/dev/nvme0n1 · Samsung SSD 980 250GB		Successfully Erased	
Serial Number	S64CNJ0R809052L	Capacity	232.9G
Media Type	ISM — NVMe SSD	Operational/Damaged	Operational
Sanitization Method	Purge	Sanitization Technique	NVMe Sanitize Block Erase
NIST Standard	NIST SP 800-88r2: Purge (NVMe SSD)		
Verification	Verification Level 100%		
Temperature	39°C (at erase time)		

MEDIA DESTINATION

Disposition	Internal Reuse	Data Backed Up	No

AUTHORIZATION

I attest that the sanitization was performed in accordance with NIST SP 800-88r2 and that the information on this certificate is accurate.

Patrick Verner	Ben Moore	Jane Doe	
Technician	Validator	Witness	Date

Sanitization per NIST SP 800-88r2 and IEEE 2883. Results are based on drive firmware responses and post-sanitization verification where performed. MD5 provides chain-of-custody verification of the Advanced Log file.
